DETAILED ACTION

The present application has been transferred to the docket of Primary Examiner Mendez due to Primary Examiner John Yasko's retirement. All pertinent contact information will be provided at the end of this action.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-8**, drawn to a balloon catheter, classified in class 604, subclass 96.01.
 - II. **Claims 9-22**, drawn to a method of making a dilation balloon, classified in class 156, subclass 215.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process of making a balloon with improved durability can be utilized in the manufacture of any medical device that have an inflatable balloon such as cannulas and dilators.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3763

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Mendez whose telephone number is (703) 308-2221.
